RE: Request for Grant of Authorization for Limited Modular Approval of a BlueTooth Device

Applicant: Apple Computer

Apple Computer wishes to apply for a Limited Modular Approval of a 2.4 GHz BlueTooth Module. The module is to be used only in Apple manufactured computers including the Apple iBook and Apple Titanium. Two unique antennas are included in this application because of unique enclosure restrictions between the computers. Where applicable, data is provided for each antenna.

BlueTooth Module Information	
Model Number	BT1915
FCC ID	BGTBT1915
1. RF Shielding	This device contains RF Shielding over the transmitter module.
2. Buffered modulation/data	The I/O of this device is limited to 1) antenna, 2) Power/Ground and 3) two differential data lines. The data is buffered.
3. Power Supply Regulation	This device has a 3.3 Volt to 1.8 Volt power supply regulator to insure the transmitter only operates at 1.8 Volts.
4. Antenna requirement	This device complies with the antenna requirement of Section 15.203 and 15.204(c). The antenna is permanently attached.
5. Stand-alone configuration	This device was tested in a Stand-Alone Configuration
6. FCC ID labeling	This device contains its own FCC ID label.
7. Operating Requirements	This device utilizes a complete BlueTooth 1.1 compliant radio transceiver and baseband.
8. RF Exposure	This device complies with RF exposure requirements for a portable device. SAR data is included with this application.

Very truly yours

Mike Kriege
